

Public Sector Apprenticeship Target Report Reporting Period: 1 April 2022 to 31 March 2023

All public bodies in England with more than 250 employees must report on the apprenticeship target as required by the Apprenticeship Regulations 2017. This target is to employ at least 2.3% of the workforce as new apprenticeship starts over the period 1 April 2017 to 31 March 2023. It is assessed as an annual average over this 5 year period, and it is mandatory to report annually. The deadline for the report to be completed is 30 September each year.

The Government requires public bodies to have regard to the target by actively considering apprenticeships, either for new recruits or a part of career development for existing staff when making workforce planning decisions.

The trust came into scope for reporting once the total number of employees exceeded 250 as at 31 March 2020. For the current reporting period of 1 April 2022 — 31 March 2023, the Academy Trust comprised of Chandlers Ridge Academy, Egglecliffe school and Sixth form college, Junction Farm Primary School, Laurence Jackson School, The Links Primary School, Whinstone Primary school, Huntcliff Secondary School and Saltburn Primary.

The annual return is split in to two parts. Section 1 is the data publication and Section 2 the Activity Return which asks for details of progress towards the target, actions taken and challenges faced in meeting the targets.

Bodies in scope are required to publish the data publication. It must be easily accessible to the public, for example external facing website and must also be sent to the Department for Education.

Return Section 1 — Data Publication

The Data Publication includes several figures, which will enable the Government, the public, and wider stakeholders to understand each body’s headcount and the number of apprentices they employ, and then use that information to assess the progress a body has made towards meeting the target.

Number of Employees who were working in England on 31 March 2022	737.00
Number of Employees who were working in England on 31 March 2023	728.00
Number of new employees who started working for you in England between 1 April 2022 to 31 March 2023	125
Number of apprentices who were working in England on 31 March 2022	3
Number of apprentices who were working in England on 31 March 2023	6

Number of new apprentices in England whose apprenticeship agreements started between 1 April 2022 to 31 March 2023	5
--	----------

Reporting Percentages

Percentage of apprenticeship starts as a proportion of employment starts between 1 April 2022 to 31 March 2023	4.00%
--	--------------

Percentage of total headcount that were apprentices on 31 March 2023	0.82%
--	--------------

Percentage of apprenticeship starts between 1 April 2022 to 31 March 2023 as a proportion of total headcount on 31 March 2022	0.68%
---	--------------

Return Section 2 — Apprenticeship Activity Return

What Actions have you taken this year to meet the target? How do these compare to the actions taken in the previous year?

During the reporting period the Trust recruited 0.68% of new employees to apprenticeship contracts. This is an increase on the prior reporting period. Apprenticeships have been considered as and when vacancies have arisen. We have broadened the range of apprenticeship programmes available and have worked with new training providers to attract apprentices in specialist areas.

What challenges have you faced this year in your efforts to meet the target? How do these compare to the challenges experienced in the previous year?

Finding appropriate apprenticeship programmes to fit the organisation continues to be difficult. In some areas it is quicker and more appropriate to complete a non-levy funded qualification.

It has been difficult to attract apprentices at the national minimum wage rate in some specialist areas and therefore it has been necessary to pay higher rates of pay in these areas.

The nature of the organisation makes it difficult for to provide apprenticeship opportunities for a large proportion of the workforce who are in teaching roles.

How are you planning to meet the target in future? What will you continue to do or do differently?

The Trust will continue to consider apprenticeships as and when vacancies / opportunities arise.

Higher level apprenticeships will be considered across the current workforce.

Higher rates of pay than the national minimum wage will continue to be considered in relevant areas of the workforce.

We will continue to explore working with a range of training providers in order to enhance our apprenticeship offer and embed apprenticeships into our recruitment and professional development frameworks.
